

LONG TERM PAVEMENT PERFORMANCE PROGRAM DIRECTIVE

For The Technical Direction Of The LTPP Program

Program Area: MATERIALS

Directive Number: M-1

Date: November 1, 1992

Supersedes: PO7, October 1, 1992

Subject: SHRP Protocol PO7 "Resilient Modulus for Asphalt Concrete"

S))))))))))))))))))))))))))))))))))))))))))))))))))))))))

This materials directive No. M-1 transmits the final SHRP protocol PO7, for resilient modulus testing of hot mix asphalt concrete. Further developmental work may be required to establish vertical displacement compliance factors. These compliance factors may be needed due to deformations in the load guide device and loading strip, and to the "take-up" between the load strip and the specimen surface.

The appropriate substitution should be made in the Laboratory Material Testing Guide.

Approving Official
Paul Teng, Chief LTPP Division
